BILINGUAL INSTRUMENT/INTERVIEWERS

January 8-17, 2021

Hello. We're conducting a survey on behalf of the Texas Lyceum, a nonprofit, non-partisan organization focused on public policy issues affecting Texas and the United States.

May I please speak with the person in your home who is 18 or older and who will be having the next birthday?

IF ASK WHY BIRTHDAY SELECTION: This helps us make sure we represent adults living within a household correctly.

IF NECESSARY: We're interested in your views on several current issues. We would like to include your responses to this survey, which will be kept absolutely confidential, with the responses of several hundred other Texans like you. The survey should take about 12 minutes to complete, depending on your answers.

Poll Methodology

From January 8-17, 2021, The Texas Lyceum conducted a 1000 person telephone survey of adult citizens from the state of Texas. The survey utilized a stratified probability sample design, with respondents being randomly selected at the level of the household and questioned by live interviewers. The survey also employed a randomized cell phone supplement, with 60 percent of completed interviews being conducted among cell phone only or cell phone dominant households. A Spanish-language instrument was developed and bilingual interviewers offered respondents a chance to participate in English or Spanish. On average, respondents completed the interview in 15 minutes. To ensure an appropriate sub-sample of unregistered citizens, a supplement of 200 interviews among Texas adults confirmed as unregistered was completed online. This yields a total statewide sample of 1,200 adults, 835 of whom are registered voters according to self-reports. The final data set is weighted by race/ethnicity, age and gender to achieve representativeness as defined by the Texas Department State Health Services 2020 population projections. The overall margin of error for the poll is +/- 2.83 percentage points, with a larger margin of error for sub-samples.
