[Q20F. How about availability of housing?](#)

[Q21. Do you agree or disagree with the following statement: I spend too much of my income on housing.](#)

[Q22. Would you say that you are satisfied with the quality of roads and highways in Texas, unsatisfied, or are you in between? Would that be very or just somewhat \[satisfied/unsatisfied\]?](#)

[Q23. What do you think is the most important issue facing K through 12 public education in Texas? \[OPEN-ENDED\]](#)

[Q24. Do you think that students attending college get their money's worth for what they spend on higher education, or do they not receive a fair return on their investment?](#)

[Q25. How important is it that we reduce the number of Texans who do not have health insurance? Very important, somewhat important, not very important, or not at all important?](#)

[Q26. Is homelessness a problem in your local community, or not? \[IF A PROBLEM: Would that be a major problem or a minor problem?\]](#)

[Q27. Would you say that immigration helps the United States more than it hurts it, or immigration hurts the United States more than it helps it?](#)

[Q28. How much do you personally worry about global warming or climate change? A great deal, a fair amount, only a little, or not at all?](#)

[Q29. Which comes closer to your view — even if neither is exactly right: Stricter environmental laws and regulations cost too many jobs and hurt the economy OR Stricter environmental laws and regulations are worth the cost](#)

2022 Texas Lyceum Poll Crosstabs

Sampling and Weighting Methodology for the 2022 Texas Lyceum Poll

From March 11-20, 2022, The Texas Lyceum conducted a 1000-person telephone survey of adult citizens from the state of Texas. The survey utilized a stratified probability sample design, with respondents being randomly selected at the level of the household and questioned by live interviewers. The survey also employed a randomized cell phone supplement, with 60 percent of completed telephone interviews being conducted among cell phone only or cell phone dominant households. A Spanish-language instrument was developed, and bilingual interviewers offered respondents a chance to participate in English or Spanish. On average, respondents completed the interview in 12 minutes. To ensure an appropriate sub-sample of unregistered citizens, a supplement of 200 interviews among Texas adults confirmed as unregistered was completed online. This yields a total statewide sample of 1,200 adults, 926 of whom are registered voters according to self-reports. The final data set is weighted to the joint distribution of race/ethnicity, age and gender to achieve representativeness as defined by the Texas Department State Health Services 2022 population projections. The overall margin of error for the poll is +/- 2.83 percentage points, with a larger margin of error for sub-samples.
